Education

since 2025

Master of Science
Practical Computer Science
Fernuniversität Hagen

Graduated 2022

Bachelor of Science
Media Computer Science

Technische Hochschule Köln

Expertise

- Frontend - Angular & React
- Backend - Spring Boot, Java
- Databases - SQL, MySQL, Oracle
- Testing & QA - JUnit, Cypress
- UI Development - Figma
- Dev Tools - Git, Maven, IntelliJ, Gradle, CI/CD (Jenkins), Docker

Language

German	native
Russian	native
English	fluent

Experience

July 2025 - November 2025

Pagina GmbH Publikationstechnologien in Tübingen

Senior Softwaredeveloper

- Developed and customized enterprise portal solutions based on the SiteFusion Portal platform using Java, Spring Boot, React, and TypeScript.
- Designed and implemented frontend functionality, reusable UI components, and customer-specific features for web applications.
- Developed backend services and integrated REST APIs to connect internal and external systems.
- Worked with SQL databases to implement and optimize business logic and data access.
- Performed code reviews, debugging, and refactoring to improve software quality, maintainability, and performance.

July 2024 - December 2024

Cm City Media GmbH in Ulm

Senior Angular Developer

- Led frontend development for a modern municipal website platform using Angular 17, TypeScript, and StencilJS.
- Designed and implemented reusable UI components with a strong focus on maintainability and scalability.
- Developed accessible (WCAG-compliant) user interfaces for public sector applications.
- Collaborated closely with UX designers and backend developers to deliver high-quality user experiences.
- Improved software quality through comprehensive end-to-end testing with Cypress.
- Participated in code reviews and promoted best practices for clean, maintainable code.

September 2023 - February 2024

LexCom Informationssysteme GmbH in Munich

Full Stack Software Developer

- Developed enterprise software solutions for the automotive industry using Java 17, Spring Boot, Angular, React, and TypeScript.
- Designed and implemented backend services and REST APIs for business-critical applications.
- Built modern, responsive frontend applications with Angular and React.
- Implemented automated unit tests using JUnit 5 and Mockito to ensure software reliability.
- Integrated business logic with relational databases and optimized SQL queries.
- Worked in an Agile Scrum team throughout the complete software development lifecycle.

About me

I am a passionate software developer who enjoys solving problems, creating new ideas, and continuously improving myself. Outside of work, I pursue my interests in Brazilian Jiu-Jitsu and game development, which strengthen my discipline, creativity, and problem-solving skills. I enjoy working in teams, exchanging knowledge, and expanding my expertise through my Master's studies and personal projects.

Technologies & Learning

- Working agile with SCRUM and Jira Tickets
- Backend & Archtiecture Spring Security, Hibernate/JPA, Microservices , REST API Design
- Frontend & Web Development Next.js, TailwindCSS, Web Components,
- Architecture Design Pattern, Clean Architecture, Software Design Priniciples
- Game Development Unity, C#, Unreal Engine, Blueprints
- Currently learning AWS, Python, Django, .NET, Kubernetes, AI development

Experience

April 2022 - June 2023

NAVAX Software GmbH in Munich

Full Stack Software Developer

- Developed and maintained enterprise banking software using modern Java technologies.
- Implemented new frontend and backend features to support business-critical applications.
- Designed database functionality and optimized SQL-based data processing.
- Collaborated with cross-functional teams to analyze requirements and implement software solutions.
- Participated in testing, debugging, and continuous improvement of existing applications.
- Worked in an Agile development environment throughout the full software development lifecycle.

October 2019 - January 2021

Beutler Saghari & Partner in Gummersbach

Working Student Software Developer

- Developed and maintained the company website to improve online presence and user experience using Angular and Spring Boot.
- Managed and optimized the database of recruitment leads to support internal processes.
- Supported the digitalization and organization of recruitment workflows for opticians and acousticians.
- Assisted the recruitment team in identifying and managing candidate profiles.
- Gained practical experience in web development, database management, and business-oriented IT solutions.

March 2018 - September 2019

CECAD Reseach Center in Cologne

Student IT Support Assistant

- Provided IT support for researchers and employees, assisting with hardware, software, and technical issues.
- Supported the maintenance and improvement of the research center's website.
- Assisted with website updates, content management, and technical improvements.
- Helped ensure smooth daily IT operations within a scientific research environment.
- Developed strong experience in user support, troubleshooting, and web technologies.

Personal Projects

Full Stack Polling Application

Developed a secure full-stack polling application using Angular 17 and Spring Boot 3.2. Implemented advanced authentication and security features including JWT authentication, OAuth2, multi-factor authentication (MFA), and CSRF protection. Designed role-based access control, administrative monitoring features, and secure deployment practices with a focus on scalable and maintainable software architecture.

Technologies: Angular 17, TypeScript, Java, Spring Boot 3.2, Spring Security, JWT, OAuth2, SQL
